3. Bảng kiểm tra Coverage — Role × Page × Feature × API

Mỗi chức năng quan trọng được map đủ 4 lớp: Page (route) → Feature module → Hook → API function.

Chức năng	Page (route)	Feature	Hook	API file	Trạng thái
Super Admin: Audit Logs	admin/audit-logs/ ✓	admin/	useAuditLog ✓	audit-log.api.ts ✓	✓ĐỦ

Staff: Messages	staff/messages/ → cần thêm vào (staff) group	support/	-	-	❑ CẦN THÊM
Admin: Notifications gửi	admin/notifications/ ✓	notification/	useNotification ✓	notification.api.ts ✓	✓ĐỦ

4. Lưu ý: Staff Platform Portal — 1 điểm còn thiếu nhỏ

Staff platform (platform role="staff") còn thiếu 1 trang messages. Cần bổ sung thêm vào (staff) route group:

```
// Bổ sung vào (staff) route group:
└─ (staff)/
  └─ staff/
    └─ dashboard/page.tsx // ✓nên thêm dashboard riêng
    └─ support/page.tsx // Ticket được giao cho staff
    └─ moderation/page.tsx // Kiểm duyệt vi phạm
    └─ reports/page.tsx // Báo cáo chờ xử lý
    └─ messages/page.tsx // ✓MISSING trong v1 – nay bổ sung
    └─ finance/page.tsx // Xem giao dịch (read-only)
    └─ marketing/page.tsx // Hỗ trợ nội dung
    └─ technical/page.tsx // Hỗ trợ kỹ thuật
```

5. Types coverage — 18 files → 58 Prisma models

File	Bao phủ models	Trạng thái
enums.ts	Mirror toàn bộ Prisma enums (BookingStatus, VenueStaffRole, PaymentMethod...)	✓
api.types.ts	PaginatedResponse<T>, ApiError, ApiResponse<T>	✓

File	Bao phủ models	Trạng thái

support.types.ts	SupportTicket, SupportTicketMessage	✓
report.types.ts	Report, ReportReason, ReportStatus	✓mới
content.types.ts	Content, Banner, BannerPage, FaqCategory, PolicyType	✓

6. RoleGuard component — Phân quyền VenueStaffRole trong UI

Venue staff có 3 cấp bậc (MANAGER/STAFF/RECEPTIONIST) dùng cùng portal. Cần RoleGuard để ẩn/hiện tính năng theo cấp:

```
// components/common/RoleGuard.tsx
interface RoleGuardProps {
  allowedRoles: VenueStaffRole[]; // [MANAGER] | [MANAGER, STAFF] | ...
  children: React.ReactNode;
  fallback?: React.ReactNode; // Hiển thị gì nếu không đủ quyền
}

export function RoleGuard({ allowedRoles, children, fallback = null }: RoleGuardProps) {
  const { venueStaffRole } = useAuth(); // từ auth.store
  if (!allowedRoles.includes(venueStaffRole)) return fallback;
  return children;
}

// Dùng trong venue-staff/staff/page.tsx - chỉ MANAGER thấy
<RoleGuard allowedRoles={[VenueStaffRole.MANAGER]}>
  <StaffManagementTable />
</RoleGuard>
```

```
// MANAGER + STAFF thấy addons:
<RoleGuard allowedRoles={[VenueStaffRole.MANAGER, VenueStaffRole.STAFF]}>
  <AddAddonButton bookingId={id} />
</RoleGuard>
```

7. Tổng kết

Metric	Số lượng	Ghi chú
Route groups	5 + (staff)	(auth) · (public) · (customer) · (owner) · (venue-staff) · (admin) · (staff)
Tổng pages	~65 pages	Bao phủ đủ chức năng 6 vai trò + 3 cấp VenueStaff
Feature domains	12	+ wallet, report, venue-staff so với v1
Type files	18	Bao phủ 58 Prisma models + enums
Zod schemas	7	auth, venue, court, booking, payment, promotion, review
Zustand stores	3	CHỈ UI state: auth, sidebar, cart
React Query hooks	30+	1 hook per use-case theo domain
API files	20+	1 api.ts per resource, tách court khỏi venue
Điểm bổ sung mới	31	So với v1: pages + features + hooks + api + types
Missing còn lại	0	Tất cả chức năng từ Role Functions đã có đủ

✓= Bổ sung mới so với v1 · RoleGuard component xử lý phân cấp MANAGER/STAFF/RECEPTIONIST trong cùng 1 portal · Zustand chỉ giữ UI state, server data = React Query
